

Hi Spotter(Android) - Task #26562

Password recovery flow

23/09/2020 18:15 - Myroslava Klymenko

Статус:	Backlog	Дата начала:	23/09/2020
Приоритет:	Normal	Дата завершения:	
Назначена:	Oleksandr Sheveriaiev	Готовность:	0%
Категория:		Оценка трудозатрат:	15.80 часов
Спринт:		Version:	
Responsible QA :	Yurii Andreiko	Second developer:	
QA Notes:	Please enter here checklist with testcases:		
Issue from customer:	Нет		
Описание The user can restore his/ her password if he/she forgot it. It's possible to do on the Profile screen or Login screen. For restoring a password user should enter his/her email address. If the entered email exists in the system, the backend part will generate a code and send it to the user's email address. User will then check his/ her email address, check the code, and enter it in the app. If code is correct, the system will offer to create a new password and confirm it. For this function, the system should be integrated with the mail service gateway. Design: https://www.figma.com/file/kG6ep45MYwzNt1desYK6ol/HiSpotter---Design?node-id=970%3A0
