

Hi Spotter(iOS) - Task #27288

Home list

29/10/2020 12:05 - Myroslava Klymenko

Статус:	Deployed	Дата начала:	29/10/2020
Приоритет:	Normal	Дата завершения:	
Назначена:	Hennadii Shelenhovskiy	Готовность:	0%
Категория:		Оценка трудозатрат:	0.00 час
Спринт:	Sprint 3	Version:	
Responsible QA :	Yurii Andreiko	Second developer:	
QA Notes:	Please enter here checklist with testcases:		
Issue from customer:	Нет		
Описание Design: https://www.figma.com/file/kG6ep45MYwzNt1desYK6ol/HiSpotter---Design?node-id=970%3A0 All Reports will be displayed in the list view. This list will be based on the map reports that located in the area which user choose. Upon entering the home screen user will see the Map with the Community reports and/or based on Profile data and location reports with the district rate based on the user location where other users shared their opinion - this result after Questionary Quiz in the app which could be re-did after time to time in the Users profile. All Reports will be presented as a tiles list going down. Also, user will have d ability to click on the Map with the existing listing. Navigation Bar includes: <ul style="list-style-type: none">- Map- Reporters- Add Report Button '+'- Notifications- Personal Users profile Map section is a section where the system will show Reports coming up based on the user's GPS location which she/he chose for the Report Spot . If GPS is off, it will show the nearest reported issues based on location information in the profile or last caught location via GPS. Search for text input (it can be any word like road, dog, etc.) Should be presented on top of the screen to make the search on reports where reported issues are potentially taking place. User can also make the search through Filter which should be blacked on the visible part of the home screen under search. When pressed on search, the dropdown list with reports opens up. After the user starts typing the system should start offering the report based on the match of first entered letters or based on matching the word like road, dog etc. Filters should be available on the home/ feed page. Filters should be the following: Status Time period Category
