Описание

Google suggests for better score at search console that the LCP is below 2,5sec.
It's only about the unique job detail pages.
How can we assure this? Maybe with AMP?

The current score is 3,3Sec.

[@suleiman.umudov.triare@gmail.com](mailto:suleiman.umudov.triare@gmail.com) we need to have technical consultation on how to improve it.
