Описание			
Scenario/Steps to reproduce Log in and navigate to job advertisement Make changes to an existing job ad. Select "safe & publish", or "save changes"			
Expected result The changes are saved or if the button safe and publish is selected - then the changes made in the job ad are saved and published.			
Actual result Sometimes, the result is are as the expected result. However, sometimes the job ads disappear/ are deleted and cannot be found. They cannot be found in the drafts. I cannot determine a particular pattern behind when the jobs are saved and when they are deleted/ disappear. However, the issue occurred to multiple people, with multiple accounts.
